How's the Market?

5.9%

Interest Rates for 30-Year Fixed Mortgage

Interest rates are still at historical lows, though they are predicted to increase in the future. This could affect your payment if interest rates climb and prices also increase.

12.9%

Change in Average Sales Price Over Last 12 Months

Prices are going up, which indicates healthy demand. Prices are forecasted to increase over the next year.

90

Days on Market (6 Months is Balanced Market)

Housing inventory remains low, so even though buyers may have less competition and fewer bidding wars, Days on Market is still far below the national average. You should still be prepared to make an offer quickly to avoid competition.

Why Hire Us?

Unrepresented

\$610K

Sellers

Exclusive Representation

\$705K

Median Home Price
for **Agent-Assisted**

On average, **sellers working with a REALTOR® sold for \$95,000 more** than those without professional representation. That being the case, can you see how an **unrepresented buyer *might pay more*** without a professional?
